

Fire Update

Royal Oak Fire Department- Acting Assistant Chief, Rick Wiegand
248-246-3800

For the week: ♦ October 23, 2011 ♦ October 29, 2011
4,775 total runs in 2011
5,470 total runs in 2010

TIP OF THE MONTH : ♦ **Install Smoke & Carbon Monoxide Detectors / Alarms**

Smoke and Carbon Monoxide DETECTORS can alert you to danger in your home in time for you to escape, even if you are sleeping. To wake up and survive a nighttime fire, you must have **working** detectors!

You should install detectors in the following areas:

- ♦ Detectors outside each sleeping area (a common hallway, for example).
- ♦ Detectors on each level of your home if more than one story. (including the basement).
- ♦ An additional detector in each bedroom, as you should sleep with your door closed.

Placement of detectors is very important. Follow the manufacturer's instructions and use these guidelines to help you.

- ♦ Mount on the ceiling at least six inches from the wall or on a wall between six and twelve inches from the ceiling, but keep detectors about six inches away from the corner where the ceiling and wall meet (the corner is a "dead air space" where the detector won't be in the path of smoke travel).
- ♦ For high pitched or "cathedral" ceilings, mount the detectors three feet from the highest point.
- ♦ Avoid placement in the path of ceiling fans, air conditioning or heater vents.
- ♦ Make certain smoke detectors are UL listed.
- ♦ Smoke detectors should be replaced every 10 years.
- ♦ When replacing smoke detectors, replace them with a lithium battery smoke detector.
(a lithium battery will last the life of the detector.)

Test detectors once a month, following the manufacturer's directions, and replace batteries once a year, or whenever a detector "chirps" or "beeps" to signal low battery power. A good time to replace your smoke detector batteries is when you reset your clocks for daylight savings time. Never "borrow" a detector's battery for another use - a disabled detector can't save your life.

Make sure children know what an alarm is. Children must know:

- ♦ Alarms warn them of danger.
- ♦ Get out of the house immediately when they hear the sound of the alarm.
- ♦ Smoke and Carbon Monoxide detectors are not toys and should not be played with.

Show your child how important these dangers are by testing your alarms every month.

-
Fires: This week 2 Total for the year 86

♦ This week we assisted Hazel Park Fire Department at a commercial building on Eight Mile rd. We have a 135 ft ariel ladder that we have used numerous times to assist other communities.

-
EMS Runs: This week 70 Total for the year 3210

-
Car Fires: This week 0

-
Hazardous Conditions: This week 3 Total for the Year 319

Other Runs: This week 33 Total for the year 1159
