# City of Royal Oak Retirement System

---

## Summary Annual Report to Members for Period Ending June 30, 2017

Dear Retirement System Member:

The retirement system, which is managed by the board of trustees, is designed to help you meet your financial needs should you become disabled, retire or die. The city also supports a retiree health insurance program, which is separate from the retirement system.

The board's fiduciary responsibility to you is to supervise the general administration of the system and invest its assets. The board retains professional employees and advisors to assist us in fulfilling these duties.

We have prepared this summary report to give you a brief overview of the retirement system and how it operates. We hope you will find it useful and informative. However, a summary cannot cover all the details of the system, which is governed by the provisions of the city's retirement ordinance, any applicable collective bargaining agreements, and the board's official rules and regulations. Additional information about the system and its financial operation is available in the finance director's office.

## Summary Results of the Actuarial Valuation

Your retirement system's financial objective is to accumulate assets necessary to pay the promised benefits in an orderly manner. To accomplish this, contribution rates are established in a manner that is designed to keep those rates approximately level as a percentage of payroll from year to year. The board of trustees of the retirement system provides for payment of the required employer contribution as described in Section 20m of the Michigan Public Act No. 728 of 2002.

To determine an appropriate employer contribution level for the ensuing year and to gauge how the system's funding is meeting this fundamental objective, an independent firm of actuaries and employee benefit consultants, Gabriel, Roeder, Smith & Company, conducts annual actuarial valuations.

These valuations are based on your system's past experience, information about current participation and financial markets, and assumptions concerning the system's future demographic and economic activity. The results of the June 30, 2017 valuation, based on continuing the established funding objective, are summarized below:

Valuation Date	June 30, 2017

Accounts Payable	(346,149)		
<b>Funding Value of Assets</b>	<b>\$154,966,938</b>	<b>Funding Value of Assets</b>	<b>\$ 154,966,938</b>

**Note:** During periods when investment performance exceeds the assumed rate, funding value of assets will tend to be less than market value. During periods when investment performance is less than the assumed rate, funding value of assets will tend to be greater than market value. The "actuarial funding method" is a mathematical budgeting procedure for allocating the dollar amount of the "actuarial present value of future plan benefits" between the actuarial present value of future normal cost and the actuarial accrued liability.

Public Act 530 of 2016 Disclosure Requirement:

This system does not pay healthcare benefits therefore there is not an assumed rate of healthcare inflation. The police officers and firefighters plan is approximately 56% funded. The city is contributing the recommended contribution to decrease the unfunded actuarial accrued liability.
