

We invite you to reimagine your downtown experience and **“Rethink”** Royal Oak as we embark on an exciting new development project to build a new City Hall, police station, downtown park, private office building and 581-space parking deck.

The project will transform the downtown area to a gathering place for the entire city as well as provide necessary updates to buildings designed more than 60 years ago.

There will be a variety of new details to share with you throughout the process including changes to the current parking options. We’ve created www.rethinkro.com to keep you current with all aspects of the project and provide you with the best parking solutions as we await our new downtown.
