

We invite you to reimagine your downtown experience and “Rethink” Royal Oak as we continue building a new City Hall, police station, downtown park, private office building and 581-space parking deck. The project will transform the downtown area to create a gathering place for the community as well as provide necessary updates to buildings designed more than 60 years ago. There are a variety of details to share throughout the process including changes to the current parking options. Please visit www.rethinkro.com to stay informed on all aspects of the project and find the best parking solutions as we await our new downtown.
