Merrill Avenue - Speed Hump Installation

The City Commission has approved the installation of speed humps on Merrill Avenue between Coolidge Highway and Woodward Avenue. These humps were approved on April 12, 2021 after months of public feedback and recommendations presented by the Royal Oak Citizens Traffic Committee.

The Department of Public Services will be installing two speed humps on Merrill later this fall to promote slower vehicle speeds. The speed humps will be anchored into the pavement and there is an option to remove them for snowplowing. The work should take one to two days to install, and each end of the roadway will remain open during installation. The speed humps are three inches tall, and motorists are allowed to park a car overtop if desired. The diagram below shows the planned locations for the speed humps and associated signage.

If you have any questions, you can contact the Engineering Division at 248.246.3260.

*Example of removable speed hump
(Example is 14-foot wide, Merrill humps will be 7-foot wide)*
