## **Notice of Construction**

### **2025 Downtown Asphalt Resurfacing Improvements**

The 2025 Downtown Asphalt Resurfacing Improvements will be performed this spring near your property or business to improve road conditions on the following streets:

• Williams Street	E Seventh Street to E Third Street
• W Sixth Street	S Washington Avenue to S Center Street
• W Second Street	S Washington Avenue to S Center Street

The project includes asphalt resurfacing, concrete pavement repairs, curbing, some sidewalk and driveway approaches, ADA sidewalk ramps, and lawn restoration. The contractor awarded this work is Ajax Paving Industries, Inc. of Troy, Michigan. The city Engineering Division staff will inspect the project.

**Construction Timeline:** Construction is anticipated to begin in **April 2025** and extend through **mid June 2025**. Work is currently not scheduled for Sundays or holidays. Construction work will begin on Williams Street and progress in the order listed above. **You can sign up for our weekly project updates via the website listed on the back of this letter to stay up-to-date on the status of roadwork.**

**Road Access:** During construction on each street, on-street parking will be limited or temporarily unavailable. Each street will be temporarily closed on the day the asphalt pavement is placed. Look for signs to be posted at the end of the blocks the day prior for this notification. **Sidewalks and business access will remain open throughout the project.**

**Driveways:** Alley and driveway approaches may be removed and replaced only when necessary to match new adjacent curbing. Commercial and multi-family driveways will be replaced in halves to ensure access at all times. **Please DO NOT move barricades or drive on new pavement until the barricades are removed by the contractor. Property owners who remove barricades and drive on the new pavement may be billed for the cost to repair damaged pavement.**

**Trash & Recycling Pickup:** There will be no change in the trash and recycling schedule unless otherwise notified by the city. If you require special access for trash or dumpster pickup by a private entity, please call or email the engineering division to coordinate.

The city realizes this construction will be an inconvenience, and all efforts to expedite this work will be utilized to minimize traffic conflicts and provide access.
