## **Notice of Construction**

### **2025 Water Main Improvements**

The 2025 Water Main Improvements project will be constructed this summer to replace the water main and water services along the following streets:

Lexington Boulevard	Marais Avenue to N. Washington Avenue
Nakota Road	Hillcrest Avenue to Crooks Road
Parent Avenue	Longfellow Avenue to dead end

The project also includes concrete pavement reconstruction and repairs, curbing, driveway approaches, some sidewalk replacement and lawn restoration. The contractor awarded this project is Verdeterre Contracting, Inc. of Belleville, Michigan and the city engineering staff will inspect the project.

#### **What You Need to Know:**

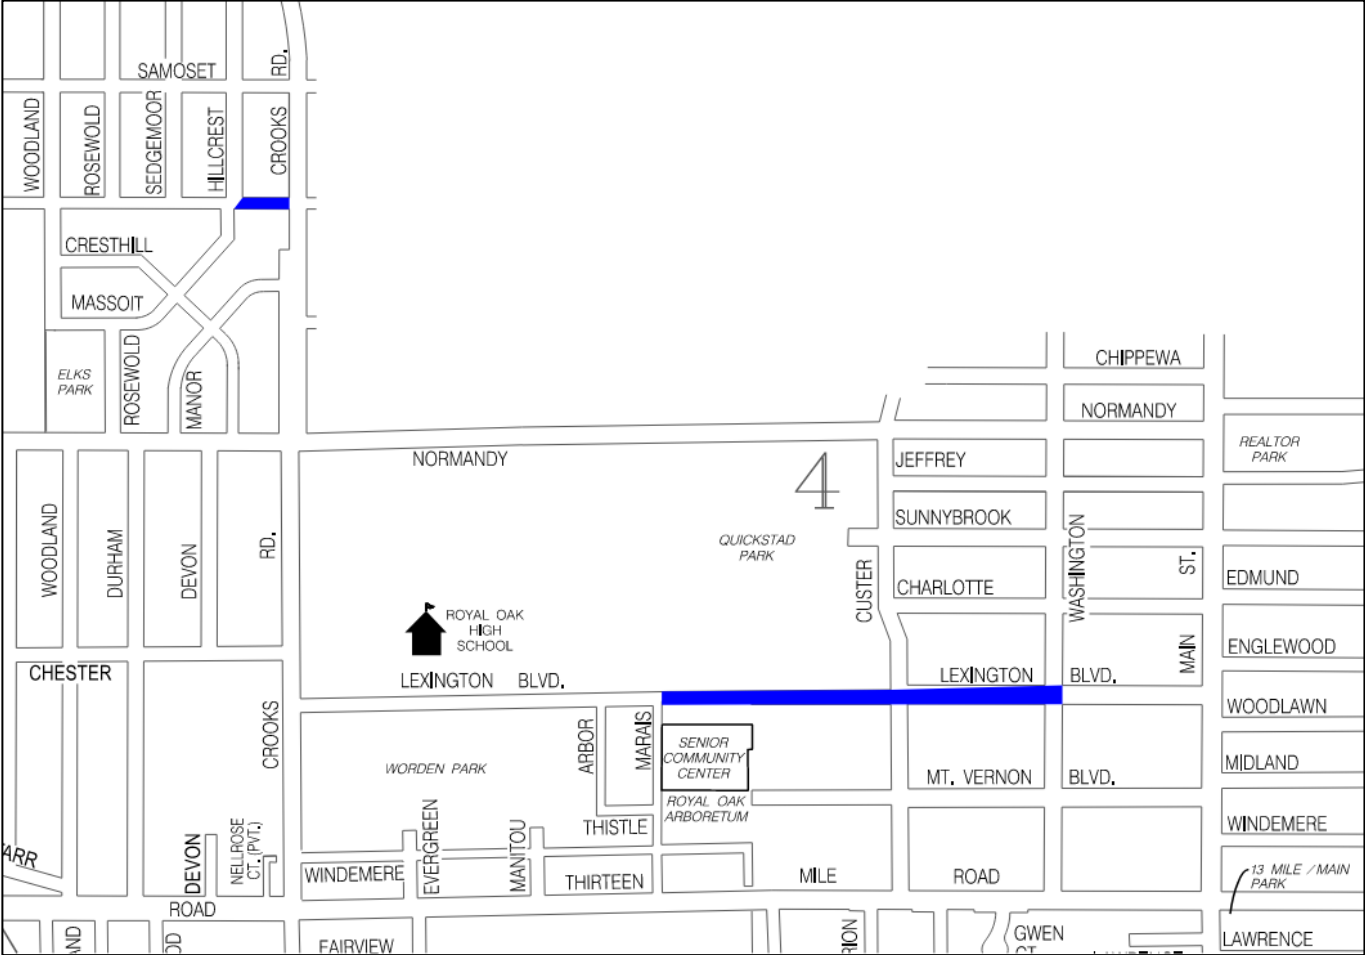

- Construction is scheduled to begin in June 2025 and extend through October 2025. On Nakota and Lexington, Consumers Energy will be upgrading some gas pipeline infrastructure in advance of the city's project starting.
- Trash and recycling will be picked up on your usual day. If necessary, the city's contractor may need to move containers to the nearest intersection for pickup. Please have address markings on all containers so they can be returned to the proper residence.
- During construction, there will be on-street parking restrictions to allow for construction equipment and residential access. Signs will be posted 12 hours in advance wherever required to allow for various construction operations. *"No Parking Tow Away Zone 7:00 am – 8:00 pm"*
- Any landscaping damaged by construction operations will be restored with topsoil and seed or sod. The city does not replace any special landscaping, timbers, bricks or planting placed on the city property within the public right-of-way.
- You can stay updated and sign up for weekly project updates via text or email at [www.romi.gov/currentprojects](http://www.romi.gov/currentprojects). You can also contact the Engineering Division with questions.

#### **Advanced Notices:**

- **Water Shutoffs** – There will be temporary water shutoffs scheduled for the connections of the new water main. Affected properties will receive a door hanger notice with the anticipated shutoff information the day beforehand. The shutoffs typically last between 4 and 8 hours.
- **Driveway Access** – If driveway access will be affected by the placement of new concrete pavement, affected properties will receive a door hanger notice the day beforehand. Residents will not have access to the driveway for a period of up to three weeks for concrete placement and curing time. *Please contact city staff as soon as possible if you have an electric vehicle. Staff will try to accommodate EV charging needs in the event you temporarily lose driveway access during construction.*
